SEPTIC SYSTEM & SMART USE

We have also been doing a number of improvements to the septic systems and we continue to work on this. But the most important part of the septic system is you the tenant. If you follow a few simple rules, our septic system will continue to run smoothly.

The most important rule is

ONLY TOILET PAPER SHOULD GO IN THE TOILET.

Do not use **powdered soap** in a washing machine or dishwasher.

Use a trash can instead of your toilet for feminine hygiene products etc. to avoid flushing unnecessarily **and to prevent harm to our septic system.**

Do not put these things in the **SINK or the TOILET:**

- | | |
|-------------------------------|-------------------------------|
| Sanitary napkins and Tampons | Diapers |
| Cotton Swabs | Cigarette Butts |
| Condoms | Wrappers, candy/gum etc |
| Grease, bacon fat, waste oils | Coffee grounds |
| Food scraps | Drugs |
| Hair (animal or human) | Baby wipes and sanitary wipes |

All of the above things should go into the garbage.
